I'm looking for a company that will give me the opportunity to expand my abilities and knowledge so that I may grow alongside the organization's goals.

WORK EXPERIENCE

Software Developer Intern
The Time Stack Pvt. Ltd.
01/2022 - 03/2022

Responsiblity / Achievements

- In my internship, we **build a SaaS product ChikuPOS** . Chikupos is first-offline-based order processing, billing and inventory management solution for small enterprises.
- I **lead a team** of three people who are developing applications using the **React Ecosystem**.
- I acquired expertise in **UI/UX, ReactJS, Redux-Toolkit, React-Query, CouchDB, teamwork,** and **project management**, as well as **code optimization** for production and the creation of a **role-based user authentication system**.
- Visit Chiku POS : chikupos.com (Now in Devlopment Mode)

React Front-End Developer Intern
Relive Technology Pvt. Ltd.
12/2020 - 02/2021

Responsiblity / Achievements

- Working as a front-end intern has been quite gratifying for me. I've got the opportunity to learn about **ReactJS, Javascript, API Integration, UI Designs.**
- I was enhancing the frontend using reactjs in order to improve the UI design of a web application.

PERSONAL PROJECTS

GPT3 Open AI Twitter Bot (self-create and post Tweet)
- Create a simple bot to test my limits in the field of artificial intelligence.
- By utilising this bot, users can automate their Twitter accounts, eliminating the need for constant activity
- Develop with the help of Twitter Auth 2.0, Open AI & Firebase

Sorting Alogrithm Visualizer (Data Structure Based) ⧉
- The user may visualise the real sorting process in this app.
- Constructed using ReactJS, JQuery and Sorting Algorithms.

Whatsapp Notification Reminder App (Twilio API, MERN) ⧉
- In this application, the user can specify key dates with accompanying messages, and the user will receive notification at the specified time.
- The app uses the MERN stack and the Twilio API to send messages to WhatsApp.

C++ Snippets VS Code Extension (Live 1800+ Downloads) ⧉
- By utilising this plugin, users can increase their ability to create code without making any syntax errors; they simply need to enter some predefined keywords.
